DETAILED ACTION

This Office Action is written in response to the Applicants' Remarks filed 6/21/11. Claims 1-4, 7-10 and 19-22 are pending.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1789

2. Claims 1-4, and 8-10 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3, 5, and 14 of U.S. Patent No. 7,968,705. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications are directed towards a method for producing a 5'-ribonucleotide composition where a microorganism is treated to release cell contents where the instant application calls this process autolysis. Utilizing and converting RNA released from cell wall material. Further both applications aim to convert RNA in the cell wall to 5'-ribonucleotides by using 5'-phosphodiesterase or both 5'-phosphodiesterase and deaminase.

Response to Arguments

3. Applicant's arguments, see pages 4-7, filed 6/21/11, with respect to the 112 2nd rejections of the claims have been fully considered and are persuasive. The 112 2nd rejections of the claims have been withdrawn.

4. Applicant's amendments to claims 1-6, see pages 4-7, filed 6/21/11, with respect to the 112 2nd rejections of the claims have been fully considered and are persuasive. The 112 2nd rejections of the claims have been withdrawn.

5. The Examiner maintains the Double Patenting rejection made in the previous Office action, and further noted that the Double Patenting rejection is no longer provisional given the issuing of a patent for application 10/541,191 now US 7,968,705.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1789
